

About Us

About Us Brief History:

Started in March 2004 with two people and few clients today we are full fledged team of IT pros and our number is expanding by the day. We've completed over 100 projects for customers across the globe. It is our beginning that has contributed to our growth and success today. Location:

Satara, India.

We have asked ourselves, "if we are an Internet company, why locate in the Metros where our clients and employees are made to inhale pollution and are spend their quality time driving through traffic jams and searching for parking" And as a result, we are in picturesque city of Satara in a beautiful city surrounded hills. Team: Some of the best minds and talent are a part of our team. We have a good balance of software engineers, web developers, content writers, business analysts, programmers, management graduates, graphic designers, customer service representatives and sales & marketing professionals. You can go to the team section of this site to meet them. Our diverse talented team is our greatest asset. Best Skills:

Quality management, technical website analysis, PHP programming, website navigation, custom software development, website design, e-commerce solutions, e-learning services. Technology Used:

We are prophets of open source software and are devoted to work for the betterment of it. We currently master in PHP, Mysql, JavaScript, HTML, CSS, Flash, Photoshop, Xml, Ajax etc. and the list is growing as we adopt more technologies for web. We are masters in Joomla! , The most popular CMS on the web and are proud that we have published over a dozen of modules for Joomla! For FREE. The Joomla development has just gained momentum and look for more components, modules, mambots, plugins from us.
